Does your office any type payment plans?

Yes! So one of the benefits of being a patient at our practice is that we offer monthly payments plans through a 3rd party company called Care Credit. This option allows you to pay for your treatment over a 12 month period; interest free, as long as payments are made on time and the amount is paid off within the 12 month period. And we actually have several patients who finance their root canals with CareCredit because not only is it extremely easy and convenient but it makes their treatment very affordable. So signing up through CareCredit is incredibly simple- you just go to their website, input your information, and if everything goes well, they'll give you an account number and you'll immediately be able to start treatment once you have that number. The process takes about 20 minutes from start to finish. I can give you their website whenever you're ready.

Do You Take My Insurance Plan?

With this carrier, our office is not an obligated provider. However, we have several patients with this exact same policy and they had some concerns about seeing a non-contracted dentist, but what they found was the fee difference was so small, that it was worth becoming a part of our practice for the quality of service we provide. So what I would recommend is for us to go ahead and verify your benefits, reserve you an appointment, and for any treatment you need, we can give you an estimate prior to starting any treatment. How did you hear about our office?
